Editorial

Faithful to its tradition spanning more than 100 years, Roger Pradier® continues to work with unrelenting passion and dedication to light up your everyday outside spaces. Our outstanding know-how in the production of outdoor lighting is widely recognised and has earned us an “Entreprise du Patrimoine Vivant” mark from the French State. We are all very proud to belong to this select fraternity of manufacturers of products of the highest quality and we are thoroughly convinced that our continued mastery over our production processes is the key to our future.

Our stringent quality standards for our lighting products are our answer to the challenges of tomorrow, with timelessness of designs and durability of products fast becoming a necessity in a world that must transition towards greater sustainability. Local production is also a key aspect, with proximity and short supply chains among the best ways of significantly limiting our impact on the environment. Roger Pradier® continues to follow this approach, with the inauguration of a new extension of our Châteauroux factory that will feature a “zero defect” painting facility among other things.

In 2022 we also plan to make it possible for customers to order our lighting products online directly from the roger-pradier.com web site. This scheme that we are implementing for mainland France puts our partner stores at the very heart of the e-commerce process, which we want to make as hands-on as possible; customers will thus be able to collect their orders from the partner stores, and Roger Pradier® will continue to recommend that you go talk to them so as to jointly find the best solution to your projects.

In order to underpin our plans for growth, we will be expanding our team once again through the creation of new roles in our organisation. Jean-Michel Vergain will thus be joining us as Managing Director. We are delighted to welcome him and look forward to pursuing our journey together with him, and with you!

Tristan De Witte - *CEO*

Stéphane Joyeux

Creative Director of Roger Pradier® since 2001, Stéphane Joyeux holds a diploma from the Creapole-Esdi Design School.

With a solid grounding in every stage of the industrial design process – research, dimensional modelling, prototype testing – he’s an expert at developing technical solutions. He has undertaken collaborative gigs in the automotive, sports and electrical industries with the likes of Plasto Design, Salomon, and Arnould, so his intuitive approach is informed by additional know-how specific to these fields. It was Stéphane who launched Roger Pradier®’s contemporary ranges of outdoor lighting. Taking the helm of the entire design process, he does his share of sketching and modelling, and provides creative oversight every step of the way.

Excellence and utility are his watchwords. He enjoys balancing ingenuity with design to address the ethical, environmental and sustainability issues inherent in lighting engineering. For Stéphane, every lamp represents an aesthetic challenge, embodying his personal commitment to design first-rate products that meet today’s standards on criteria like energy efficiency and longevity.

He’s known for the innovative form and playful feel of his lighting fixtures, including Equix, Grumo, Brick, Bamboo, Sherlock, RP195, and the Ibuk wall light, which won the 2015 VIA Award for its originality. His design approach interweaves childhood memories and innovation with technical understanding, so that after the initial surprise, you see that utility is the only remaining reason...

© Julien Jouanjus

matali crasset

La Hutte

matali crasset, an industrial designer by training, experiences design as a form of seeking. The offbeat stance she takes as her starting point informs her interventions in the everyday, and prompts imagined scenarios for the future.

Her knowledgeable – yet always fresh – worldview leads her to question the unassailable nature of conventions, all the better to break free of them. She operates in many spheres, her interventions always linked to her encounters. Eclectic collaborations – from handicrafts to contemporary art, from the textile industry to fair trade – have led to her working in scenography, furniture, architecture, graphic design and art. So far, her associates on various projects include artist Peter Halley, up-and-coming designer furniture companies, local authorities (Geneva Cité Library, the town of Istres) and local communities.

With this wealth of creative practice under her belt, matali is now veering towards increasingly participative projects, working at both local and global scale, and in rural as well as urban settings.

Her fictional inventions, her narratives, and the meaning of her work are essentially bound up with the question of community and living together.

© Dimitri Coste

Patrick Norguet

Square

French industrial designer Patrick Norguet has taken an unusual career path in his pursuit of the flawless line. He’s well known among the big names of high-end designer furniture, both in France and internationally. A fateful meeting with Giulio Cappellini in 1999 and the subsequent release of his famous Rainbow Chair propelled Patrick into the top ranks of the design elite.

There’s a very French elegance and ‘fittingness’ about his pieces, whether they’re intended for the masses or a more upscale market.

Norguet’s work has won a long string of awards, along with a place in the permanent collection of New York’s MoMA and in the Museum of Modern Art in Miami.

In creating his timeless, beautifully balanced objects, he draws inspiration from the world around him, and from the generous spirit of people he meets.

© Morgane Le Gall

Normal Studio

Séléné

Working together as Normal Studio, design duo Jean-François Dingjian and Eloi Chafaï promote a kind of design stripped back to its most fundamental. Their name dissimulates a yearning for perfect form. The timeless objects they produce fly in the face of fashion and posturing, reflecting their strong belief in the social and cultural values of design.

By 2016 when Normal Studio celebrated its first decade on the French scene, it already had a pile of accolades to its name. The Design/Enterprise award at Designers’ Day 2010 honoured the team’s collaboration with Tolix, where they were creative directors from 2007 to 2013. They won 2010 Designer of the Year at Maison & Objet’s Now! Show, followed by the Elle Deco Design Award, and numerous VIA labels. Some of their products are now held in the collections of the French Museum of Decorative Arts and the Fonds National d’Art Contemporain (France’s state-owned contemporary art collection).

Normal Studio designed Séléné for Roger Pradier®, a range that was awarded the 2011 VIA Label.

© Tristan Everhard

Cédric Ragot

Tank

A multi-talented French designer influenced by contemporary art, Cédric Ragot has marked the design world with the sensitive, intuitive aesthetics of his sober objects.

This prolific designer set up Cédric Ragot Design Studio in 2002 to work alongside big-name brands on development and positioning.

A very intuitive designer, Ragot has been recognised with numerous accolades.

Some of his pieces are in the Fonds National d’Art Contemporain and on display in Paris, Hannover, Vienna, New York, or Milan.

With his latest design, Tank, he leaves the abiding imprint of his talent on Roger Pradier®.

Roger Pradier® warranties

25 year anti-corrosion warranty

The Roger Pradier® company commits itself to replace any faulty part that shows sign of corrosion in a period of 25 years from the date of acquisition by the final client, upon presentation of the purchase invoice.

The guarantee applies only to the aluminium part of Roger Pradier® products installed above ground in accordance with industry standards and with the original surface treatment being intact.

Exclusions: products that are scratched, scored, covered with silicone, cement, or any other material, or that have suffered collision or various chemical treatments. This guarantee also excludes any phenomenon that may modify the aspect of the covering over time, natural dirt, deposits of all types, etc. ...

The warranty requires the product(s) to be returned to the factory. No exchange prior to that return can be considered. Roger Pradier® will only replace the damaged part and not the whole appliance; transport, dismantling and installation costs are excluded.

The Roger Pradier® company reserves the right to analyse or to have analysed, by any method of its choice, the damage caused by corrosion, in order to determine the reliability and the conditions of the said damage. In any event, this guarantee does not apply to the various electrical components and accessories of the product.

5 year technical warranty

Other than the specific 25 year anti-corrosion warranty, Roger Pradier® products are guaranteed for 5-years. The technical warranty covers over a 5-years period from the date from the acquisition date by the final client, upon presentation of the purchase receipt. This warranty shall only apply to products installed according to current practice and which are used in conformance with our recommendations. Any intervention or modification made to the product and its components is expressly excluded from this warranty.

The warranty requires the product(s) to be returned to the factory. No exchange prior to that return can be considered. Roger Pradier® will only replace the affected component(s) and not the whole appliance; transport, dismantling and installation costs are excluded.

Roger Pradier®'s sales commitment

- A century's worth of experience as a French manufacturer of outdoor lighting devices
- Widely acknowledged expertise
- A culture of quality
- External inspections
- International certifications. Refer to the US catalogue for UL-certified references.

La Hutte

Design matali crasset

The "La Hutte" lamp draws inspiration from the shape of a primitive hut, a circular shelter built around the fire that was essential to life.

Its protective glass casing is like the walls of a house, storing and then releasing photons. "La Hutte" is a shelter, a kindly presence that reproduces the warmth and light of a home fire.

The lamp consists of two elements: a metal base available in all colours, and a transparent blown glass upper. The design comes in three versions, either a table lamp, a model you can hang, or a floor lamp.

Tank

Design Cédric Ragot

Inspired by the New York water tanks, the Tank lamps are such as light storehouses.
Almost larger than life, contrasted finishes with opalescent diffuser and a wooden base, Tank lamps blend industrial codes and the habitat world to multiply usages.

Tank

Retified wood / Sandblasted stainless steel
Opal polypropylene diffuser

Cooper

Séléné

Design Normal Studio

Séléné has a presence that is almost sculptural. This range, which comes with pureness of line, was born of close observation of the know-how gained from the techniques of tin-smithing.

"The generosity of the form calls to mind the leaf of the water lily. The velvety appearance of the colours chosen is a counterpart to the downy surfaces of some plants," say Jean-François Dingjian and Eloi Chafai.

The masked light source gives out a beautiful luminous halo that plays with the colour of the support.

Commitment against light pollution

Roger Pradier® is committed to complying with the new regulations against light pollution. In France in particular, the Decree of 27 December 2018 on the prevention, reduction and limitation of light pollution regulates lighting practices. Since 1 January 2020, these provisions apply to «light installations» in order to be consistent with today's environmental issues.

Colour temperature < 3000K
ULOR < 1

Compliance with PRM Standards (Person with Reduced Mobility)

Any external path must be structured in such a way as to allow any user, and in particular persons with reduced mobility (PRM), access to the entrance of an establishment open to the public. For this path to be accessible, taking into account the transition zones, its horizontal mean illumination level (Eav) to be maintained at ground level over its entire length must respect 20 lux average (according to the legislation of each country).

Many Roger Pradier® luminaires make it possible to meet PRM requirements. They can be identified in the pages of this catalogue by the presence of a PRM table. Some collections, such as Tetra and Hector, offer special performance thanks to the Asymmetrical LED technology that allows spacing of up to 12 m for bollards and 25 m for poles, while respecting the Eav = 20 lux.

Hector Asymmetric p.26

PRM Eav 20 lux

LED ASYM 35W	Pathway	Spacing
H 3,00 m	3,00 m	25,00 m

Tetra Asymmetric p.32

PRM Eav 20 lux

LED ASYM 12W	Pathway	Spacing
H 1,10 m	2,00 m	12,00 m

Ingress Protection (IP) ratings

The degrees of protection (IP) are defined by the french standard NF EN 60-529

IP **X**_: protection rating against solids

- IP **0**_ No protection
- IP **1**_ Protected against solid foreign objects over 50 mm in diameter (e.g. involuntary contact with the hand)
- IP **2**_ Protected against solid foreign objects over 12 mm in diameter (e.g. finger)
- IP **3**_ Protected against solid foreign objects over 2,5 mm in diameter (e.g. tools and wires)
- IP **4**_ Protected against solid foreign objects over 1 mm in diameter (e.g. small tools and wires)
- IP **5**_  Dust-protected (no harmful deposits)
- IP **6**_  Totally protected against dust

IP **_X**: protection rating against liquids

- IP **_0** No protection
- IP **_1** Protected against vertically dripping water (e.g. condensation)
- IP **_2** Protected against dripping water up to 15° from vertical
- IP **_3** Protected against direct spray of water up to 60° from vertical
- IP **_4**  Protected against direct spray of water from all directions
- IP **_5**  Protected against jet of water from all directions applied by spray lance
- IP **_6**  Protected against direct sprays of water comparable to big waves
- IP **_7**  Protected against the effects of immersion
- IP **_8**  Protected against long periods of immersion under pressure

Glossary

«Boomerang»: wall mounting plate

Can be easily and quickly fixed to any surface.
Allows pre-mounting.
Isolates the aluminium casing from the wall.
Wall light can easily be rotated and locked in place.

«Easycap»: waterproof quick-connect system

«Easycap» is a patented membrane that allows wires to be directly connected.

Solid-core wires can be directly pushed through the membrane.
For stranded wires, the installer must crimp cable terminals first.

Information

Each reference is a complete product.

Bulbs are not included.

All standard Roger Pradier®'s electrical plugs are Schuko type F (mobile models).

Models in brass or copper are provided with black aluminium supports.

The steel supports are not covered by the anti-corrosion warranty.

The coating of brass, copper, zinc, stainless steel, galvanized or enamelled steel models can deteriorate depending on the climate or the environment. These materials are not guaranteed against oxidation.

It is recommended to regularly maintain the light fixtures in accordance with the practices of the profession and to prohibit the use of any abrasive or corrosive material or product.

Our terms of sale are listed on the back of our delivery notes and bills.

As part of its constant strive to improve the quality of the light fixtures, Roger Pradier® reserves the right to modify, without notice or compensation, all or part of the equipment presented in this catalogue.

The images, dimensions and scenarios in the photographs in this catalogue cannot be regarded as contractual.

Acknowledgements

We would like to thank those who allowed us to photograph our lights by opening their doors to us:
